# THE X PROPHECY

Before the GLXs started thriving in the space,  
they prided themselves with an  
Ethos, which says:

080-fin, 06-kun, 20020-dun, there shall be  
Spare the soldier inside these ships  
Tho thy have great fortunes from thy kins  
For GLXs who prove thy valiance  
Achieve great wealth amongst him

# ABSTRACT

The Prophecy. 獅秦。 La profecía ةوبنلا. Пророчество.

To avoid overcomplicating the technological subtleties, we will attempt to condense the content in a way that is suitable to the typical 90 IQ tiny human brain.

GLX was established upon entry into this realm of time, with the ability to utilize the power of the blockchain and decentralization in order to infinitely expand upon and honor the true vision of a new financial paradigm. One of your greatest leaders once said, “We are an experiment in decentralized spontaneous community building” which is what GLX has aimed to accomplish while providing otherworldly utility and ecosystem beyond this time.

It is with this utility we choose to preserve your civilization after seeing our own civilizations expand beyond what our home world was able to provide. Much like our own species, human society is on a downward spiral. The current system is dominated by destruction, greed, enslavement, and corporate domination. \$GLX, \$GAP and our Dark Metaverse is our gift to you.

We are your salvation.

Everything starts in the fourth dimension (Hereinafter; TFD).

# GENERAL GRAPHIC OVERVIEW

## 1.1 AUDIT

### Executive Summary

According to the assessment, the Customer's smart contracts are well-secured.

\$GLX cares about its community and its safety. That is why we prioritized getting a top-quality audit done by Hacken:

- <https://hacken.io/audits/>

The audit report contains all found security vulnerabilities and other issues in the reviewed code.

In conclusion, the smart contracts are well-secured, at the top of the possible security score.

# GLX TOKEN TECHNICALS

## 1.2 TOKEN LAUNCH

Our launch was fair. The fairest in the Universe. GLXger deployed the project with the help of another experienced developer. Your ally and own kind deemed it was only responsible for burning half of the supply and putting up liquidity himself for the humans' K9-like loyalty to his previous work. From that point forward, GLXger has promised this will always be a project dedicated to people who believe in its vision and community.

## 1.3 TOKEN UTILITY

Tokenomics: \$GLX, Plasma Points and GAP

### Allocation & Unlock Schedule

Total Supply at GLX opening: 720,000,000glx

Initial GLX Supply: 36,000,000 glx

Private Sale Price: \$0.05

Public Sale Price (GLX): \$0.07

Listing Price (GLX): \$0.095

### Playing & Staking Rewards

These tokens will be distributed to incentivize players to participate in the game through competitions and other Play-to-Earn and activities

Allocation of 35% of total

Supply of 126,000,000 glx

0% unlocked at the GLX, then 5% each month (21 months / 20 transfers)

### Ecosystem

Tokens that will be used to grow GLX GAMES COMMUNITY , marketing events, business development, public awareness and other community building and marketing activities. This allocation also will be used for the game development and operational expenses.

Allocation of 20% of total  
Supply of 144,000,000 glx  
4% unlocked at the GLX, then 4% each month (25 months / 24 transfers)

### Private Sale

Tokens reserved for a private sale:  
Allocation of 20% of total  
Supply of 144,000,000 glx  
10% unlocked at GLX, then 2 months cliff, then unlock 5% each month (21 months / 18 transfers)

### Public Sale (GLX)

These funds will be used to bootstrap liquidity in the GLX reserve pool.  
Allocation of 5% of total  
Supply of 36,000,000 glx  
20% unlocked at the GLX, then 20% each month (5 months / 4 transfers)

### Team

Tokens allocated for GLX GAMES strategic partners, advisors, team and shareholders.  
Allocation of 15% of total  
Supply of 108,000,000 glx  
0% unlocked at the GLX, then 25% each 6 months (25 months / 4 transfers)

### Advisors

Tokens allocated for GLX GAMES strategic partners, advisors, team and shareholders.  
Allocation of 5% of total  
Supply of 36,000,000 glx  
0% unlocked at the TGE, then 25% every 6 months (25 months / 4 transfers)

### GLX Opening

Immediately following the conclusion of the Private Sale, we will create a transaction to conclude the presale and open the bonding curve for trading. Full details coming soon.

## 1.4 DAO GOVERNANCE

The Fourth Dimension (Hereinafter; TFD) ecosystem's \$GLX tokens will be distributed for voting inside a DAO – decentralized autonomous organization structure, assuring the project's self-sustainability in the absence of an owner.

We despise the traditional hierarchy; GLX aspires to be a completely community-governed ecosystem. In comparison to other projects that use a fixed structure and a traditional system of employees and executives. Through dialogue, GLX will ensure that the community is included in important decisions. Because there were no team tokens or allocations, everyone in TFD, including the "team", is an investor; everyone is on an equal footing and has a vested stake in the project's success. In the future, holders of \$GLX will have the ability to propose ideas and vote on them to steer the project forward.

## Why are we obsessed with the principles of DAO?

Simple. We have always aspired to be free in our universe. At the very least, those of us who are intelligent. The rest of our species waged battles over insignificant matters and toiled away in a cubicle, which is eerily similar to where human society is heading. And how can you be untethered in the most efficient, technologically inspired way possible? Decentralization. As well as the DAO concepts. True freedom. The outcome is unearthly when decentralization is combined with the freedom of anonymity and governance. It's something our species has aspired to since the dawn of time. We were never completely successful, though.

\$GLX is our second attempt at making it work. And we're devoting all of our extraterrestrial resources to perfecting this ecosystem. If you have the good fortune to read the entire paper, you will see that this is not your typical shitcoin. This is what may truly set you apart from the rest of humanity.

DAO governance traditionally entails a treasury that the community and various team members may jointly control via on-chain voting methods.

Nonetheless, \$GLX does not have any team members that hold a vast treasury since \$GLX is the most fairly launched cryptocurrency in the universe. However, certain individuals share our altruistic perspective and our cognitive process. Prominent believers and GLX holders who share our beliefs have made contact and desire to contribute to making this the BIGGEST crypto ecosystem ever seen.

## 1.5 STAKING AND FARMING

To ensure that only the true believers of \$GLX will be rewarded, we will initiate early staking and farming opportunities. You will be able to utilize \$GLX tokens to earn Plasma points. Plasma points will not be tradable on Uniswap or any other decentralized exchange. They will function as a currency only available inside the \$GLX ecosystem and The Dark Metaverse. However, GLX, GAP and NFTs can be traded.

By staking GLX or GLX/ETH LP to the cosmos, you will be an early adopter of exotic and rare NFTs, only buyable through the two secondary tokens of the GLX ecosystem, Plasma Points and GAP.

## 1.6 COSMOS EVENT

Ah. The Cosmos Event.

Perhaps our most incredible creation yet. It is inextricably linked to our vision. The Cosmos is meant to be an expansion of our fair launch. Early adopters of \$GLX will have the opportunity to be the very first to participate.

The DAPP previews have been released. When live, you will be able to farm Plasma points. These plasma points will, in turn, be used to buy origin GLXeps(NFTs). Anyone presently in the #GLXARMY will gain an early edge as a result of this.

This can be dropped at any time.

There will only be a certain number of origin GLXeps. Early participants in The Cosmos thus get an advantage.

Let the countdown begin.

Through our staking dApp, you will be able to farm Plasma Points, which will be the first step before you as a player to enter and earn money from GLX's first blockchain game, Super Galactic.

The first phase of the dApp: As you enter the Super Galactic staking dApp, you will have the choice between joining two different pools to earn Plasma Points.

### 1. Single-staking \$GLX pool

### 2. GLX/ETH LP pool

The first option, single-staking \$GLX pool, only requires you to stake \$GLX tokens. The benefit is that you will not suffer the consequence of impermanent loss. However, the APY rewards will be lower. The second option, GLX/ETH LP pool, requires you to add GLX/ETH liquidity. The APY rewards will be more significant with this option.

# GAP TOKEN

## 1.1 GAP TOKEN

The \$GLX ecosystem primarily includes three tokens: GLX, Plasma Points, and GAP. Each of them has a specific use case.

\$GLX is the primary token in the ecosystem. It will be the connector between everything \$GLX. As an example, to play the first game in the ecosystem, Super Galactic, you will first need to stake GLX or GLX/ETH LP in The Cosmos.

From The Cosmos (staking dApp), you will earn Plasma Points. Plasma Points will be needed to buy soldiers (NFT, GLXeps) to play the game.

GAP is the third token. To fuse (breed) soldiers within the game, GAP is required. This can be earned through daily quests and missions in Super Galactic.

The easiest way to earn Plasma Points and GAP is through The Cosmos.

## 1.2 GAP TOKEN TECHNICALS

Each staker in the cosmos contract proportionally receives Plasma Point and GLXs used for breeding new GLXeps. The distribution of Plasma Points peaks during the first quarter and reduces until Quarter 2 of its second year of distribution. With the help of holy grace, the power to mint new Origin GLXeps reduces over time to develop the underlying game ecosystem and reward early adopters by making Origin GLXeps valuable.

Origin GLXeps produced during the cosmos have some unique characteristics. They are stronger and more qualified to have better ratings that help them perform efficiently against other alien races than other GLXeps. OrginGLXep can't breed to produce another Origin GLXep. The clan of GLXeps can be divided into the following classes inside the GAP realm

Emission Rate of Plasma Points from the Cosmos (This emission shown below is changed)

# NON-FUNGIBLE TOKENS (ERC-721)

## 1.1 NFT ARCHITECTURE

### The function of Rating, Plasma Points, GAP and GLX

Our complex NFT- and Tokenomics system will allow players to earn money (P2E) while playing Super Galactic. The tables below are an effort to structure the different functions (Plasma Points, GLXeps, GAP, and GLX).

Origin NFTs produced during the cosmos have some unique characteristics. They are stronger and more qualified to have better ratings that help them perform efficiently against other alien races than other GLXeps. To mint these, you need Plasma Points.

Origin GLXep can't breed to produce another Origin NFT. The clan of NFTs can be divided into the following classes inside the Dark Metaverse:

1. Origin GLXeps
2. Gen Alpha GLXeps
3. Gen Beta GLXep

Class	Initial Rating Score
Origin GLXeps	100
Gen Alpha GLXeps	Varied, based on parent's rating
Gen Beta GLXeps	Varied, based on parent's rating

Table A. Initial Class Dependent Rating Score GAP

**Table A.** Ratings for each GLXeps influence how many GAPs a person may gain during the combat with the alien species in The Truth's PvE game.

	Attended QuestDay	Missed QuestDay
Origin GLXeps	Rating += 10	Rating - = 3
Gen Alpha GLXeps	Rating += 10	Rating - = 4.5
Gen Beta GLXeps	Rating += 10	Rating - = 6

*Table B. Impact on rating score per quest day*

**Table B.** The quests influence a GLXep's rating score, as seen in the table above. With a better rating score, the GLXep will be able to collect a more significant amount of GAP prizes, which will allow them to reproduce and expand their clan.

GLXep plays and accomplishes missions (battles) in The Truth daily to earn between 5 and 20 GAP (depending on their rating).

After completing tasks daily, a GLXeps rating score rises. If a GLXep defeats the aliens in their separate bouts, they will get an additional 5 GAP. As a result, they become stronger over time and are motivated to do so. NFTs that are dynamic in nature depict these GLXeps. They are born with a rating score but can improve it; their birth does not define them; after all, they are Grace's offspring. A Gen Alpha GLXep or a Gen Beta GLXep can build a rating score greater than an Origin GLXep by completing their daily tasks without fail every day.

On the other hand, even a powerful GLXep's rating score and performance capacity might be lowered if they remain passive in the game and fail to complete tasks.

Any GLXep	GAP Earn Capability/Quest
Rating $\geq$ 100	20
Rating $\geq$ 10 & Rating $\leq$ 99	10
Rating $\geq$ 1 & Rating $\leq$ 9	5

Table C. Rating dependent GAP

**Table C.** Even if a GLXep is a direct descendant of the Grace, the amount of warriors they can have is restricted, and if they don't stay active and earn the GAPs needed to reproduce, they will go extinct. The only method to do so is to finish and attend quests on a regular basis.

Class	How are they Produced?
Origin GLXep	Stake GLX-ETH in the Cosmos, Earn Plasma, Redeem Origin GLXep
Gen Alpha GLXep	Breed inbetween- OriginGLXep * OriginGLXep OriginGLXep * Gen Alpha GLXep  Cost- 200 GAP + 14631874 GLX
Gen Beta GLXep	Breed inbetween- Gen Alpha GLXep * Gen Alpha GLXep OriginGLXep * Gen Beta GLXep beta* beta alpha*beta  Cost- 200 GAP + 14631874 GLX

Table D. Rating dependent GAP

**Table D.** According to the Truth, the user should have two unrelated GLXeps, burn 200 GAPs, divert 14631874 GLXs, and wait 14 days before producing a new GLXep to make it operate a helpful ally in the fight against extraterrestrial creatures.

A new Alpha GLXeps is born after the breeding cycle. Each breeding cycle has an unintended consequence for the parent GLXeps. As a result of their inability to attend to the daily missions in the game, the GLXeps who helped breed remained inactive, leading to a loss of their ratings, as estimated from **Table B**.

The Truth employs genetic algorithms to ensure that each GLXep can only mate with a non-related GLXep seven times. The number of GAPs and GLXs is required to increase each time dramatically.

Breed Number	GLX Cost	GAP Cost
0/7	14631874	200
1/7	25631874	300
2/7	33631874	500
3/7	45631874	800
4/7	56631874	1900
5/7	67631874	2200
6/7	73631874	3000

*Table E. Cost for breeding with the same GLXep*

**Table E.** This rising cost goes hand in hand with the developing game economy and restricts overbreeding at any particular time.

Class	Rating For New Offspring
Gen Alpha GLXep	Rating of (Parent1 +Parent2)/2.5
Gen Beta GLXep	Rating of (Parent1 +Parent2)/3

*Table F. Parent dependent Child Rating*

**Table F.** Ratings for each GLXeps influence how many GAPs a person may gain during the combat with the alien species in The Truth's PvE game. Users who utilize a GLXep in a mating ritual lose rating points for their GLXep due to inactivity, resulting in inferior offspring and discouraging breeding until the GLXep is restored. This ensures that only powerful children are bred, and it encourages the force to keep active and earn back their rating (spirit) by completing daily tasks.

The clan remains robust and powerful, ensuring that the bulk of GLXep's population remains committed to the war against the alien creatures.

## **THE REWARD SYSTEM:**

Users can get an Origin class GLXep from the Cosmos event in the early days, but the rate of minting an origin class falls dramatically with time. Users interested in supporting the cause of GLXep can later acquire the GLXep on the open market and earn GAP tokens by completing daily missions.

GAPs may be sold in exchange to get money, or they could be used to assist the GLXeps clan's progress by having healthy children. The healthy children may then be sold to the next person in line based on their ratings, which would directly impact their capacity to earn money from daily missions.

Users who fight for the right cause and help destroy the wicked alien species wreaking havoc are rewarded in this fashion. It also serves as a launchpad for future users eager to battle with their fellow GLXeps, establishing a closed-loop for value generation inside the GLXep clan.

## 1.2 NFT DEPLOYMENTS

### Phase 1

The cosmos event will be the first phase of available NFT minting. 10.000 NFTs will be minted between multiple varying characters with specific special in-game skills. However there will be special randomized characteristics with different rarities amongst these.

### Phase 2

- In-game assets created as NFTs added to the Dark Metaverse (skins, weapons, power-ups etc)
- NFT marketplace (for game assets + characters)
- Breeding characters to create a new character as NFT

# THE DARK (MATTER) METAVERSE

“Our observed universe has three dimensions of space.  
We propose that there may be a fourth dimension  
that only dark forces know about.”  
-Lucas Soares,

As the creators of what you see as GLX have traveled long and far, we have unveiled many truths, discovered many civilizations, and developed a vast understanding that reaches far beyond what is fathomable for human beings. It is our goal to reveal for you the Ultimate Truths of The Universe.

Dark Matter is how humans understand it as a hypothetical form of matter thought to account for approximately 85% of the matter in the universe.

We are here to tell you it is not so hypothetical and to provide a window of opportunity for this species.

## 1.1 THE DARK METAVERSE OVERVIEW

A gamified ecosystem of cosmic gaming, virtual space, as well an open tradeable marketplace of the universe's most sought after artifacts (ERC-721).

## 1.2 MOTHERSHIP INCUBATOR AND GAMING IDO LAUNCHPAD

Much like the Universe, the Dark Metaverse will continue to grow. We have already received many requests from notable game developers to join the Dark Metaverse as well as universal ideations to be incubated in the mothership.

### **1.3 VIRTUAL DARK MATTER SPACE ACQUISITIONS**

The Truth will enlighten you and expand through unobserved areas in the universe. With this, limited virtual territories will be available for purchase in the Dark Metaverse. These territories will be in the form of ERC721 tokens but also allow owners to fractionalize their territories (NFTs) to others.

In order to mint your own territory, you must own 3 rare genesis NFTs to create a council, X Amount of GLX tokens and GAP tokens to create a territory treasury.

These virtual territories are able to be parceled off via OTC or marketplace auctions by fractionalization. THIS IS AN IRREVERSIBLE ACTION.

Here is the catch. Each gaming addition into the Dark Metaverse will be dedicated to a certain virtual area of space. Projects that enter the mothership's deployment queue will go through a lottery system to determine which location in space and time that it will live.

Owners of these spaces will own a percentage of the project based on how large it is as well as compounded DAO voting rights within the Mothership. Outright owners of these areas will not need to share with anyone outside of the great leaders of the Mothership and the project itself.

### **1.4 P2E ARCHITECTURE + IN-GAME NFTS**

In the initial days, users can grab an Origin class GLXep from the cosmos event but the rate to mint an origin class decreases drastically over time. Later on users who get interested in supporting the cause for GLXep purchases the GLXep from the open market and are able to earn GAP tokens for attending to daily quests. GAPs can be sold on an exchange to earn revenue or be fruitfully utilized to help the GLXeps clan move forward by producing healthy offspring. The healthy offspring could then be sold to the next participant in line according to their ratings which would directly influence their capability to earn a revenue through their daily quests.

In this way users who fight for the right cause and help defeat the evil alien race raking havoc gets rewarded, and at the same time acts as a launchpad for hiring future users who would be willing to fight alongside their fellow GLXeps, forming a closed loop for value creation within the Dark Metaverse.

## **SUPER GALACTIC**

Our complex NFT- and Tokenomics system will allow players to earn money (P2E) while playing Super Galactic.

Super Galactic is an RPG/arcade action/ARG game that lets you battle and breed digital super soldiers in GLX's first revealed fourth dimension realm. This is also the introduction to The Dark Metaverse's own finite in-game assets (GLXeps).

It's a combination of an auto battler decentralized game, NFT collection, built on Ethereum network and integrated with a scalable full-stack solution. Players get access to almost zero gas fees for the minting and can exchange for assets and sub-second transaction time with all user-maintained custody. Each GLXeps is a playable NFT endowed with a uniquely generated power force known as Spirit Force. These NFTs are destined warriors who have landed in a scavenged world endowed with an alien race that destroys the world's peace and tranquility, The Dark Metaverse realm.

To play Super Galactic, you need a playable character. These are the NFTs called GLXeps.

Players can get an Origin class GLXep from the Cosmos event in the early days, but the rate of minting an origin class falls dramatically with time. To mint these, you need Plasma Points (Stake \$GLX, earn Plasma Points).

Users interested in supporting the cause of GLXep can later acquire the GLXep on the open market and earn GAP tokens by completing daily missions.

GAPs can be used to assist the GLXeps clan's progress by having healthy children. The healthy children may then be sold to the next person in line based on their ratings, directly impacting their capacity to earn money from daily missions.

Users who fight for the right cause and help destroy the wicked alien species wreaking havoc are rewarded in this fashion. It also serves as a launchpad for future users eager to battle with their fellow GLXeps, establishing a closed-loop for value generation inside the GLXep clan.

# SPACE MAP

## LAUNCH PHASE (BQ4)

- Deploy Contract
- Audit (Hacken)
- Website Launch
- CMC and Gecko List

## GROWTH PHASE (Q4)

- LitePaper Release
- Cosmos Event
- Farming
- NFT Minting
- Marketplace Unveil
- WP Release
- Reveal Partnerships
- Super Galactic
  - Phase 1
  - Phase 2
  - Phase 3
  - PVE Co-op
  - PVP
- Dark MetaVerse
- First Territories available for mint
- Mothership Opening
- First Gaming IDO

## GROWTH PHASE (Q4)

- Continued Super Galactic Development
- Continued Dark Metaverse Integration And Development
- New Blockchain Game
- Gaming IDO's

## MATURITY PHASE (Q3 2022)
